

 **HERMANCYBER™**

**HUMAN RISK MANAGEMENT**

 **REMOTELYME**

# Security & HR teams lack visibility

**Our HRM software & services deliver insights & improvements in 9 minutes**

# Traditional Security Awareness Training

**No Predictive Risk Scores**

*Who's at risk for phishing, passwords, mistakes, etc.?*

**High Friction, No Personalization**

*Who needs which SAT courses, why and when?*

**No Adaptive Controls**

*Who needs which compensating controls or access restrictions?*

**No HRM**

*Training is useless if it's forgotten within 30 days.*

Forrester and Gartner say traditional security awareness training (SAT) may be obsolete and needs to be replaced with Human Risk Management (HRM). Why? Because 90% of security breaches are caused by mistakes, and Gallup says 77% of workers are disengaged and make 60% more mistakes. New NIST CSF 2.0, CIS18, PCI DSS 4.0, GDPR, and other mandates focus on "people" requirements for communications, risk-aware cultures, roles, responsibilities, supply chains, and HR practices, and SAT may no longer be compliant. One breach, audit failure, or lawsuit could result in millions for remediation, brand damage, and lost revenue.

*"CISOs see training's limitations and use HRM to detect human behavior and measure and manage risk..." -Forrester*

It's time to stop paying too much and not getting enough. RemotelyMe's **HERMAN CYBER™** costs less and transcends SAT in three key ways:

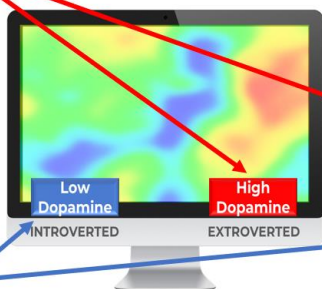

- **INSIGHTS:** Human Risk Management insights into risks, security, engagement, and compliance
- **PERSONALIZATION:** Personalized, effective training to improve employee security, engagement, and culture
- **IMPROVEMENT:** Security, trust, engagement, and compliance improvement trends and validation

*"RemotelyMe offers unique technology that could make them an HRM leader, including the behavioral science Gartner and Forrester say is a key requirement that's missing from other solutions." -Rob Smith, former Gartner Security Analyst*

## HERMANCYBER™

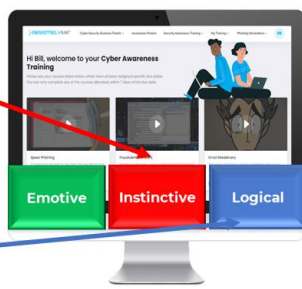

**Predictive Risk Scores**

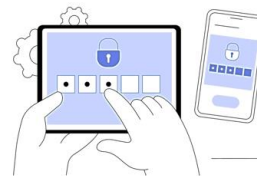

*Know who's at risk in only nine minutes.*

**Personalized Training**

*Personalize training based on risks & roles.*

**Adaptive Controls**

*Personalize controls & access based on risks.*

**HRM**

*Behavioral science training increases retention 16X.*

# Managed HRM Services

***Limited team and time to implement HRM? No worries, we do it all for you at low cost!***

- Our proprietary HRM software
- Our certified HRM team
- Affordable, fast & effective
- Immediate insights & improvements
- Validated NIST Govern compliance
- Personalized training & phishing exercises
- Behavioral risk alerts & analyses
- Security, soft skills & leadership courses
